Supported by

Obstetrical and Gynaecological
Society of Malaysia

CPD points provided

Introduction:

Dear Participants,

It is that time again when we conduct our next session of Masterclass In Laparoscopic Surgery with the theme "Then and Now".

During this workshop we will be showcasing cases of Laparoscopic Surgery that can be done by conventional method using Diathermy to the latest techniques and energy sources.

The course will be conducted over 2 days so that you can fully take in the live laparoscopic surgeries for Benign Gynae pathologies of the uterus, tubes and ovary by a foreign invited surgeon alongside our local experts.

There will also be short informative lectures interspersed between the surgeries along with screening of short video clips with helpful tips and tricks from our expert surgeons. This workshop will be able to cater to all and enhance your laparoscopic skills no matter the type of Laparoscopic set up available at your centre.

At the end of the course, we hope that you have benefited from this workshop and acquired useful skills and knowledge. Therefore, we hope to see you all in HSAH, Sungai Petani.

Who should attend?
