

REGISTRATION

There is a **limit of twelve (12) participants** so that each participant receives maximum benefit from the practical and discussion components. **Please Register Early**

Name _____ MCR _____

Mobile _____ Tel / Fax _____

E Mail _____

Clinic/Institution _____

Address _____

Postal Code _____

Have you been immunized against tetanus? Yes No
Workshop Dinner: Yes No
Dietary preference: Muslim Vegetarian Other _____

Registration Fee:

This includes registration and workshop attendance, course materials, an instructional DVD and CD that will be sent to attendees prior to the workshop, refreshments, lunches and workshop dinner

Early Bird (before 14 January 2012) **SGD \$1,800**

Full Registration Fee **SGD \$2,300**

Enclose a crossed cheque / bank draft in Singapore Dollars made payable to **National University Hospital**, and send with this Registration Form to:

The 1st Urogynaecological Anatomy of Complications Workshop, Singapore

A two-day intensive hands-on workshop on the anatomy, prevention and management of complications in urogynaecological surgery

Date: Saturday 25th – Sunday 26th February 2012
Venue: Advanced Surgery Training Centre (ASTC)
Kent Ridge Wing Level 2
National University Hospital

This meeting has been approved for

- 8 CME points by the Singapore Medical Council

Organised by:

National University Health System, Department of Obstetrics & Gynaecology

Yong Loo Lin School of Medicine
& Faculty of Dentistry

Sponsored by:

About the UROGYNAECOLOGICAL Anatomy of Complications Workshop

The Urogynaecological Anatomy of Complications Workshop (Urogynae ACW) aims to improve the performance of specialist surgeons in the area of prevention and management of complications in urogynaecological surgery. This workshop is an intensive, hands-on, practical learning experience that was conceived and developed in October 2000 by gynaecologic oncologist Ian Hammond and urologist John Taylor in Perth, Western Australia when they recognized that their specialist colleagues in obstetrics and gynaecology were not always comfortable in dealing with inadvertent injury to urological, gastrointestinal and major vascular structures. They believe that a thorough understanding of the surgical anatomy of the pelvis underpins successful and safe clinical practice and this theme is fostered throughout the workshop.

An integrated two day programme was developed and an innovative anatomy module was also developed by anatomist Professor Paul McMenamin. The 1st ACW held in Singapore on 24-25 Nov 2007 was immensely successful and this workshop is now held twice yearly at the National University Hospital. This is a urogynaecologically-focussed version of the ACW that will be of interest to all urogynaecologists, urologists, and colorectal surgeons who perform surgical correction of pelvic organ prolapse and urinary incontinence, especially with the use of tapes and meshes. It will be of particular value to specialty trainees and fellows in this area.

This is an intensive practical surgical procedure workshop. Participants will acquire a new range of surgical solutions. Participants will develop a better understanding of the surgical principles, approach and techniques relevant to bowel, urological and vascular repair sometimes encountered in pelvic floor surgery. Please note that the workshop program is demanding. There will be facilitators at each session and a maximum of 12 participants. Participants will work in pairs and these 'pairings' are rotated at each session to allow for maximal interaction.

The program has been structured in a graduated fashion starting with clinically relevant surgical anatomy especially of the pelvic floor, moving to surgical procedures and then further practice of procedures in the animal laboratory. The final session allows for a stimulating interaction between the participants and faculty that helps us all to understand how best to manage and avoid the complications which occur as part of routine surgical practice in urogynaecology. For more information on the workshop, log on to <http://medicine.nus.edu.sg/obgyn/ACW/index1.htm>

The Workshop is open to all

- Urogynaecologists, gynaecologists, trainees and fellows who perform pelvic floor surgery
- Urologists, General and Colorectal surgeons and trainees/fellows

The 2-day workshop will be held at National University Hospital's Advanced Surgery Training Centre, which boasts cutting-edge training facilities utilizing state-of-the-art technology with, surgical and educational amenities spread over a 1,000 sqm area.

WORKSHOP PROGRAM: DAY ONE, Saturday

PELVIC ANATOMY

8.00 - 8.30 am	Arrive and register (Breakfast included)
8.30 - 8.45 am	Opening Address & Overview of Workshop
8.45 - 9.00 am	Introduction and Review of Workshop Objectives
9.00 - 9.30 am	Anatomy Quiz with interactive keepads (pre-MCQs)
9.30 - 10.30 am	Interactive Lecture: Surgical Anatomy of the Pelvis
10.30 - 10.55 am	TEA BREAK
10.55 - 11.00 am	Introduction to Practical Anatomy Session
11.00 - 12.30 pm	Anatomy Prosections with specific learning tasks
12.30 - 1.00 pm	Anatomy Quiz with interactive keepads (post-MCQs)
1.00 - 1.45 pm	LUNCH

SURGICAL SKILLS LABORATORY

1.45 - 2.15 pm	Repair of cystotomy (demo + practice) using pig bladder
2.15 - 3.15 pm	Repair of ureteric injury (demo + practice) using pig ureter: Use of Double-J ureteric stent
3.15 - 3.45 pm	Repair of enterotomy (demo + practice) using pig bowel
3.45 - 4.00 pm	TEA BREAK
4.00 - 5.00 pm	Bowel resection and anastomosis (demo + practice) using pig bowel
5.00 - 5.30 pm	Repair of anal sphincter (demo + practice) using pig anal sphincter
5.30 - 5.45 pm	Review of day
6.30pm	WORKSHOP DINNER

WORKSHOP PROGRAM: DAY TWO, Sunday

ANIMATE LABORATORY

8.00 - 08.15 am	Arrive and change into surgical attire (Breakfast included)
8.15 - 08.30 am	Outline of morning and pig anatomy review
8.30 - 12.30 pm	Open surgery (anaesthetized pigs): Repair of cystotomy, Ureteric dissection, ureteric transection and reanastomosis, Repair of enterotomy, Dissection of pelvic vessels, Loop ileostomy / end colostomy, Anal sphincter repair, Repair of damage to vein and artery, use of OAT patch to control severe vascular injury
1.00 - 2.00 pm	LUNCH

COMPLICATIONS IN PELVIC SURGERY

2.00 - 5.30 pm	Urogynaecological Intra and Post-operative complications: Case presentation and interactive discussion (Tea break included)
5.30 - 6.00 pm	Review of day; Course evaluation; Presentation of course certificates

Course Convenors:

Dr Roy Ng, Urogynaecologist, Department of Obstetrics & Gynaecology, National Univeristy Health System, Singapore

Dr Phil Daborn, Urogynaecologist, King Edward Memorial Hospital for Women, Perth & University of Western Australia, Western Australia

Dr Lim Min Yu, Gynaecologist, Department of Obstetrics & Gynaecology, National Univeristy Health System, Singapore

A/Prof Jeffrey Low, Gynaecologic Oncologist, Department of Obstetrics & Gynaecology, National University Health System, Singapore

A/Prof Rajendran K, Department of Anatomy, Yong Loo Lin School of Medicine, National University of Singapore, Singapore
