RCOG-OGSM Life Saving Skills Course 2010

A Comprehensive Course in Emergencies in Obstetrics and the Newborn

Organised by

The Obstetrical & Gynaecological
Society of Malaysia

In Collaboration with

The Royal College of
Obstetricians & Gynaecologists

Supported by

The Ministry of
Health Malaysia

Message from the Organisers

The Obstetrical and Gynaecological Society of Malaysia (OGSM) and the Ministry of Health (MOH) have continuously been organising CME activities to further enhance the skills and knowledge of its practitioners within the fraternity. The first Life Saving Skills Course was conducted in June 2008 and we have to date trained 245 participants. Sixty have also undergone the train the trainers course with 29 certified by the RCOG and 31 awaiting certification. As for the year 2010, six courses will be conducted at various centres in the country.

It is our fervent hope that the participants would be able to utilise the knowledge gained in improving the care of the labouring women and the newborn.

We hope you will benefit tremendously from the Course.

Obstetrical and Gynaecological Society of Malaysia

Ministry of Health Malaysia

About the course

Dear Colleagues

On Behalf of the OGSM, we have great delight to announce that six Life Saving Skills Courses will be conducted for the year 2010. The programme is very comprehensive and covers all possible obstetric emergencies that one encounters in the maternity setting. It is an intensive and practical oriented course with lots of hands-on and will be conducted by certified trainers trained by the RCOG.

The Course covers short lectures, skills teaching, case scenarios, workshops and demonstrations on manikins and equipments. The emphasis is on the emergencies in the Labour Room. The topics covered include the ABCs of Maternal Resuscitation, Newborn Resuscitation, Eclampsia, Haemorrhage, Shock, the Unconscious patient, Sepsis, Obstructed Labour, Instrumental Deliveries, Shoulder Dystocia, Multiple Gestations, 3rd & 4th Degree Tears and Surgical Skills in C-Sections and Perineal Tears.

Course materials will be provided to the participants and each participant will receive a joint RCOG-OGSM certificate upon completion of the Course. The registration fees are heavily subsidised by the OGSM.

It is envisaged that eventually all personnel in active obstetric practice would have completed this course at least once with the eventual aim of reducing adverse maternal and neonatal outcomes.
