** Workshop 3 has been canceled.*

Workshop 1 by AOFOG Ultrasound Comm.

[Brochure download](#) 

[Go to detailed program](#) 

- Time: 09:00 ~ 12:50
- Program
 - Part 1. Fetal brain
 - Part 2. Advances in prenatal diagnosis and treatment of spina bifida
 - Part 3. Heart of the matter
 - Part 4. Precision in sonographic diagnosis of pelvic pain

Workshop 2

by AOFOG Reproductive Endocrinology & Infertility Comm.

[Go to detailed program](#) →

- Time: 09:00 ~ 12:00
- Theme: Seed vs Soil – what else can we do?

Despite the major technological advances achieved by ART in the last three decades, the success rate of ART to achieve a pregnancy remains at an overall of 30-35%. Success of ART is dependent on the quality of the gametes, egg, and sperm (the seed) as well as the endometrium receptivity (the soil) to ensure successful implantation and the development of a normal viable pregnancy.

Join our REI experts as they share and review on the latest developments in the field of gametogenesis and implantation to discover ways to improve ART success for couples seeking to conceive.

Workshop 4

by AOFOG Oncology Comm.

[Go to detailed program](#) →

- Time: 09:00 ~ 12:00
- Theme: State-of-the-art of Management of Ovarian Cancer

Objective

- To update the knowledge on the management of advanced / recurrent epithelial ovarian cancer
- To learn the importance of molecular profiles in treating epithelial ovarian cancer

Highlights

- Lectures covering pre-clinical and clinical advances in epithelial ovarian cancer
- Panel discussion on a few interesting cases
- Interactive discussion with experts in different countries

Workshop 5 by AFOG 2024 Organizing Comm.

[Go to detailed program](#) →

- Time: 09:00 ~ 12:00
- Theme: Radical Hysterectomy

Workshop 6 by AFOG Urogynecology Comm.

[Go to detailed program](#) →

- Time: 09:00 ~ 12:00
- Theme: Narrated Video Demonstration of Urogynecological procedures

The purpose of this workshop is to provide an updated overview and narrated video demonstration of a variety of urogynecological procedures.

Topics will cover a wide range of anti-incontinence procedures (eg. TVT, TOT, and mini sling), pelvic organ prolapses surgeries (eg. native tissue repair, transvaginal mesh, pectopexy and sacrocolpopexy), bladder injection therapy and cosmetic gynecology. Mastering different urogynecological techniques and procedures is essential to suit each individual patient's needs. During this workshop, the attendee will be able to review a multitude of urogynecological procedures while also learning various tips and tricks from our speakers.

Workshop 7 by AFOG YGAA Comm.

[Go to detailed program](#) →

- Time: 09:00 ~ 12:00
- Program
 - How to Build and Refresh Skills in Obstetrics and Gynecology - Part 1. Soft Skills in Ob Gyn
 - How to Build and Refresh Skills in Obstetrics and Gynecology - Part 2. Ultrasound Doppler Skills - Scanning and Interpretation
 - How to Build and Refresh Skills in Obstetrics and Gynecology - Part 3. How to Acquire, Refresh and Train for Surgical Skills - A Practical Approach
 - How to Build and Refresh Skills in Obstetrics and Gynecology - Part 4. Instrumental Delivery in Modern Obstetrics
 - How to Build and Refresh Skills in Obstetrics and Gynecology - Part 5. Thoughts from YGAA and YGA's 2024

- Time: 14:00 ~ 17:30
- Theme: Endometriosis or vNOTES

As the use of MIGS for treatment of gynecologic disease has advanced, training of novice and experienced surgeons has become paramount. Trainees benefit from standardized curricula to ensure sound skills and knowledge.

Recently, transvaginal Natural Orifice Transluminal Endoscopic Surgery (vNOTES) has been launched into daily practical MIGS of several AOFOG societies other than conventional vaginal, laparoscopic, or robotic surgeries. vNOTES is highly preferred due to its painless and scarless approach.

On the other hand, it is also true that there is a definite difficulty for becoming a good vNOTES surgeon. In this interactive workshop, speakers will share experience with integrating a vNOTES training program including successes and struggles. Experience with the essentials in vNOTES for the standardized and safe surgical knowledge and skills will be highlighted.

The precise instructions of safe transvaginal entry and scope handling will be presented in detail followed by discussion of surgical technique to facilitate vNOTES approach in the appropriately selected patient. The attendees will then be able to put this knowledge into action during the hands-on workshop. At the conclusion of this session, attendees will be equipped to incorporate and enhance a successful training program in vNOTES.

Workshop 9 by ICOE

[Go to detailed program](#) →

- Time: 14:00 ~ 17:00
- Theme: Master the Unexpected: A Hands-On Caesarean Section Masterclass for Clinicians

This intensive masterclass equips you with the clinical edge and hands-on skills to confidently navigate complicated high risk Caesarean surgeries. Designed for practicing obstetricians and trainees, this immersive program aims to providing practical solutions for on table emergencies.

What you will learn:

- Master techniques to repair uterine lacerations, vaginal extensions, bladder tears
- Safely handle second stage, adherent placentas and Caesarean hysterectomies
- Adhere to safe surgery principles
- Navigate challenging scenarios like second-stage arrest and adherent placentas
- Discuss complex case studies
- Fine tune your decision process in timely fashion

Workshop 10 by AFOG 2024 Organizing Comm.

[Go to detailed program](#) →

- Time: 14:00 ~ 17:00
- Theme: Contraception

Workshop 11

by AFOG Oncology Comm.

[Go to detailed program](#) →

- Time: 14:00 ~ 17:00
- Theme: Lymph Nodes Dissection

Objectives

- To update the knowledge on various aspects related to lymph node dissection in gynecologic cancers
- To learn the advances in the surgical approach of retroperitoneal lymphadenectomy

Highlights

- Lectures covering topics related to lymph node dissection in various gynecologic cancers
- Video sharing on different approaches of retroperitoneal lymphadenectomy
- Interactive discussion with experts in different countries

Workshop 12

by Journal of Obstetrics and Gynecology Research (JOGR)

[Go to detailed program](#) →

- Time: 14:00 ~ 17:00
- Theme: Scientific Writing

Generally speaking, academic papers transcend “time” and “space”. In other words, scientific works are like a kind of time capsule in which we can feel the observation and intelligence of our predecessors in the past.

If we write a paper in English, scientists in countries all over the world can read it. We must not only receive the wisdom of our predecessors, but we must also leave something behind for future generations yet to come. This is a bridge of intelligence that transcends generations.

The Journal of Obstetrics and Gynecology Research (JOGR) is the English-language journal of the Japanese Society of Obstetrics and Gynecology and the official journal of the Asia and Oceania Federation of Obstetrics and Gynecology (AFOG). Papers submitted to JOGR are first assigned to an Associated Editor (AE) in their respective fields. These AEs consist of about 100 people, mainly from university hospitals in Japan, and are responsible for handling about 2-3 papers per month.

This academic session will explain how to write such basic academic papers from the viewpoints of editors and experienced authorities. In addition, basic statistical methods and examples of fraudulent papers will be introduced to outline points to keep in mind when submitting paper.

Workshop 13

by AFOG Sexual & Reproductive Health Comm.

[Go to detailed program](#) →

- Time: 14:00 ~ 17:00
- Theme: Gender-based violence
