CALL FOR ABSTRACTS
On behalf of the Organizing Committee, it’s my great honor to welcome you to the 15th Annual Congress of the Asia Pacific Association of Gynecologic Endoscopy and Minimally Invasive Therapy (APAGE). The theme of this Congress is “Understanding the Science to Master the Art.” Despite the great advances made in Endoscopic Surgery in Gynecology, there are still many gynecologists who prefer to perform surgery by traditional laparotomy. This conference is aimed at encouraging more gynecologists to acquire the art of endoscopic surgery. To this end, the scientific committee has prepared a programme to cater for a wider audience: the novices as well as the experts in endoscopic surgery.

Besides the scientific programme, a trade exhibition featuring the latest developments in products and services will also be held to enable delegates receive the most up-to-date information on innovations in the area of Endoscopic Surgery.

The ultimate success of any congress is the memories left behind. We have invited international and local experts in endoscopic surgery to share their experiences and to teach both basic and advanced endoscopy. We have also prepared a pre-congress endoscopic workshop and a post-congress laparoscopic workshop which endoscopic surgery experts will demonstrate the art of endoscopic surgery.

The Obstetrical and Gynaecological Society of Malaysia (OGSOM) is honored to host this annual congress with the Asia Pacific Association of Gynecologic Endoscopy and Minimally Invasive Therapy (APAGE).
