### PRESIDENT

### Obstetrical and Gynaecological Society of Malaysia (OGSM)

Dear Doctor,

Greetings from the Board of Directors of the Philippine Society for Reproductive Medicine (PSRM).

It is with great pleasure that we announce that the Philippines has been chosen to host the **11th Asian Congress on Endometriosis** by the **Asian Society of Endometriosis and Adenomyosis (ASEA)**. This congress is in collaboration with the Philippine Society for Reproductive Medicine and will coincide with PSRM's 29th Annual Convention.

This will be a full two-day HYBRID event to be held on September 25-26, 2023 at the Manila Marriott Hotel in 2 Resorts Drive Pasay City, Manila.

In its mission to promote world class health care in the field of reproductive medicine in the Philippines, the society embarks on this worthy endeavor to further the knowledge of obstetrician-gynecologists in the country and our colleagues in the Asian region and around the globe on the management of endometriosis.

The theme for ACE 2023 is **"Transforming Lesions to Lessons: The Role of Multidimensional Care of Endometriosis"**. The cutting-edge scientific program aims to put forth real world experiences regarding its management focusing more on patient care and not just the lesions.

### CALL FOR PAPERS

We would like to **INVITE YOUR INSTITUTION/SOCIETY** to submit interesting cases and research papers for oral, video or electronic poster presentation. This is **OPEN TO ALL AUTHOR/S** of papers on the topics of endometriosis and adenomyosis.

The deadline for submission of abstracts will be on **MAY 15, 2023**. Please see the guidelines for submission and submit entries at the congress website <https://www.ace2023manila.com>.

It will be our honor to have you and your department/society members as our guests.

**Registration opens March 1, 2023** as a kick-off to the World Endometriosis Month. Please visit the Congress website for more details at <https://www.ace2023manila.com>

We are looking forward to your company this year.

Sincerely,

Debby Pacquing-Songco, MD  
PSRM Vice President 2023  
Overall Chair for ACE 2023
