PREFATORY

Dear aspirational friends, colleagues and obstetric medicine enthusiasts,

It has been a decade of maternal medicine in Malaysia and I am proud to invite you to our biennial scientific convention, exclusively dedicated to maternal medicine and high-risk pregnancies, the highly anticipated “5th Malaysian Obstetric Medicine Scientific (MOMS) Conference 2026”.

As a pioneer in maternal medicine, I reflect on our modest inception in 2016 and it has been ten years of learning, advocating and championing maternal medicine, redefining standards and elevating quality of maternal health in Malaysia. I am proud to note that our passion and dedication remains stronger than ever before as we continue to learn and evolve.

We live in an interesting intelligent era, with significant evolution in the world of medicine and obstetrics, where science continues to break barriers, far greater than ever before and this Avant Garde scientific colloquium aims to bring home the highest standards of science and medicine. The obstetrics in 2026 should be advanced, holistic, safe, personalised yet impactful for mothers and newborns and I invite you to immerse yourself in the modern and future of medicine and obstetrics at the 5th MOMS Conference this February 2026 as we strive to deliver yet another world class academic experience; equipped with the MOMS DNA with emphasis on scientific purity.

With an updated and state of the art scientific programme, conceptualised for the subspecialists, experts, generalists, trainees and primary care physicians, we will dive deep into the world of medicine and obstetrics as we better appreciate the distinctive link, to debate and discuss advancements, controversies and evidences presented by masters of the art. With a world-renowned faculty diversified by expert clinicians, with a leading-edge scientific programme incorporating the width and depth of maternal medicine, an evidence-based scientific symphony of medical disorders in pregnancy, themed “*Cogito Ergo Sum*” awaits you.

If you would like to make a greater impact and save more mothers lives, appreciate the future of obstetrics and stand tall in the evolving world of medicine, join us this February at the 5th MOMS Conference as I promise yet another world class scientific meeting like no other.

Dr Muniswaran Ganeshan,
